CHRISTIAN MIGUEL M. ANDAL

FULL STACK WEB DEVELOPER | SOFTWARE DEVELOPER

Pasig City | 0961 619 8038 | christianmiguelandal@gmail.com | LinkedIn: Christian Andal | GitHub: ChristianAndal

PROFESSIONAL SUMMARY

Full Stack Web Developer and Software Developer with 5+ years of combined academic, project-based, and professional software development experience building professional, compliant, and production-ready systems. Experienced in enterprise web applications, SaaS platforms, financial management systems, HRIS, point-of-sale solutions, mobile applications, and Oracle APEX/OCI development for government, academic, and private-sector clients. Strong in full-stack development, system and database architecture, integrations, deployment, testing, reporting, and issue resolution.

TECHNICAL SKILLS

Languages: PHP, JavaScript, C#, Java, Python, SQL, AL
Frameworks & Platforms: Laravel, Vue.js, Django, ASP.NET, Android Studio, Oracle APEX, Oracle Cloud Infrastructure (OCI), Microsoft Business Central
Databases & Reporting: Microsoft SQL Server / SSMS, PostgreSQL, RDLC, Power BI, database architecture, database migration, stored procedures, triggers
Web & Development Tools: REST APIs, HTML, CSS, Bootstrap, XAMPP, Git, GitHub, deployment, system integration
Professional Strengths: System architecture, problem-solving, analytical thinking, communication, teamwork, adaptability, project coordination, quality assurance

PROFESSIONAL EXPERIENCE

Go Venture Int. - Philippines | Remote **Current**

Founder & Lead Developer

Founded and lead GoVenture, overseeing technical direction, product development, and overall software architecture.

- Lead the end-to-end development of Vicinity SaaS, from system architecture and database design through implementation, testing, deployment, and production readiness.
- Designed and manage a scalable multi-tenant database architecture focused on maintainability, reliable data management, and future growth.
- Established engineering practices and technical foundations that transformed Vicinity from an initial concept into a deployable, shippable SaaS product.
- Drive key technical decisions across frontend, backend, infrastructure, and database layers while guiding the platform toward production readiness.

Wizzard Technologies Inc. - Ortigas, Pasig City **July 2025 - Present**

Full-Stack Web Developer

Developing and maintaining full-stack applications using Laravel, Vue.js, Android Studio, Oracle APEX, and OCI for accounting, HRIS, financial management, and government systems.

- Contributed to the development of a University Accounting Management System for a higher education institution, focusing on frontend and backend development using Laravel and Vue.js.
- Assisted in developing an RFID-Based Android Application for a government energy agency, enhancing application features and functionality using Android Studio.
- Developed a Financial Management Information System (FMIS) for a state university, streamlining financial operations, accounting workflows, and financial reporting.
- Designed and developed a Modern Financial Management System for private-sector organizations, implementing scalable architecture to improve financial tracking, reporting, and overall system maintainability.
- Created and developed a Barangay Accounting Management System for a local government administration, improving financial management, reporting, and accounting processes across multiple barangay offices.
- Designed and developed the Dreamwave Hotel Mobile Room Service Management Application using Android Studio, implementing room service management features, room checklists, camera-integrated functionalities, and API integrations for backend communication.
- Designed and developed an Electronic Portal and Human Resource Management System for government labor and dispute-resolution agencies, implementing modules for Overtime Applications, Leave Applications, Personal Data Sheet (PDS) completion, and report generation for the 2025 and 2026 system versions.
- Developed and migrated a Corporate Website and Content Management Platform to Oracle APEX as an Oracle APEX Developer, building and maintaining the application within Oracle Cloud Infrastructure (OCI) while supporting the transition of existing website functionalities to the Oracle APEX environment.

Systema Solutions Canada **January 2025 - April 2025**

Technical Consultant - Microsoft Business Central (Internship)

- Supported and optimized Microsoft Business Central solutions based on business and operational requirements.
- Customized Business Central functionality using AL and developed Power BI reports for business insights.

MotoNation **July 2023 - December 2024**

Full-Stack Developer - ASP.NET Web POS System (Project-Based)

• Developed backend features for a web-based POS using ASP.NET and C#, managed SQL Server data, stored procedures, triggers, audit trails, and RDLC reports.
• Designed dashboards and operational data visualizations for sales, inventory, and management decision-making.

SELECTED PROJECTS

Vicinity - Multi-Tenant SaaS POS **Current**

• Developing an online SaaS point-of-sale platform for multi-tenant businesses, combining real-time operational workflows with a flexible hybrid database architecture.
• Built with Django/Python, PostgreSQL, and Vue.js, with architecture designed for scalability, maintainability, responsive operations, and production deployment.

MasterMoto: Inventory Optimization and Demand Forecasting DSS **2024**

• Developed a web-based DSS using ASP.NET, C#, ML.NET, and SQL Server to forecast demand and support inventory replenishment.
• Integrated with a POS platform and generated sales and inventory reports using RDLC; built the frontend with JavaScript, HTML, and CSS.

Connect: Social Media Platform **2025 - Ongoing**

• Developing a Python/Django social media platform with WebSocket-based real-time chat, notifications, and dynamic user interactions.

Company Management System with QR Code Attendance **2023**

• Developed a PHP-based company management system with QR attendance tracking using HTML, CSS, JavaScript, and XAMPP.

Additional Development Projects **2021 - 2024**

• Built the Etcetera e-commerce website using HTML, CSS, and JavaScript and developed the Cats Away role-playing game in Unity using C#.

EDUCATION

Bachelor of Science in Computer Science **2021 - 2025**

STI College Novaliches / STI College Marikina

Graduated Cum Laude | President's Dean's Lister

Accountancy, Business and Management **2019 - 2021**

Siena College of Taytay

CERTIFICATIONS & TRAINING

• Oracle Academy Java Foundations | Microsoft Azure Security Technology | Cybersecurity in the Cloud (AZ-500 Workshop)
• Power BI: Visualizing Data and Creating Impactful Charts | AI-Powered Workflows with Power Automate | AI-Powered Code Generation
• Mastering GitHub Copilot Workshop | Cybersecurity Bootcamp | Basic Web Development Workshop

AWARDS & ADDITIONAL INFORMATION

Awards: Best Software Quality Assurance; Most Commendable System Analyst; Most Commendable Information Management Project; Certificate of Appreciation for Peer Evaluation
Language: English
